Econ 5/Poli 5D: Class 12 Exercises

The goal of this exercise is to translate your knowledge of logic from Excel and Stata to R. Additionally, you will be exposed to using brackets to refer to subsets of data frames and vectors.

1. Download the script class12.R, rename it LastName_FirstName_class12.R, and open it in RStudio.
2. Complete the exercises labeled as "pre class exercises", before watching Class 12 lecture video.
3. After watching the video, attempt the questions given under "In-class activity".
4. Submit LastName_FirstName_class12.R via Canvas.
