Econ 5/Poli 5D: Class 11 Exercise

The goal of this exercise is to have you install and run RStudio before class so that all of class time can be spent learning how to use R.

1. [Download](#) and install R if you haven't already. Choose Mac OS or Windows depending on your computer.
    a. For Windows, click "base" on the next page, and finally, click "Download R 3.5.3 for Windows" to begin the download.
    b. For Mac, click the link that reads "R-3.5.3.pkg" to begin the download.
2. [Download](#) and install RStudio Desktop (free version) if you haven't already. Choose the correct installer based on your platform and run it once the download is complete.
3. After both of the above tasks have been completed, open RStudio. Download the script class11.R, rename it LastName_FirstName_class11.R, and complete the listed exercises in the Exercise section.
4. Submit LastName_FirstName _class11.R via Canvas.
